- DTE

The Developmental Teacher Education Program (DTE) is dedicated to improving the quality of classroom learning by educating elementary teachers to create equitable classrooms for linguistically and culturally diverse learners in urban settings.

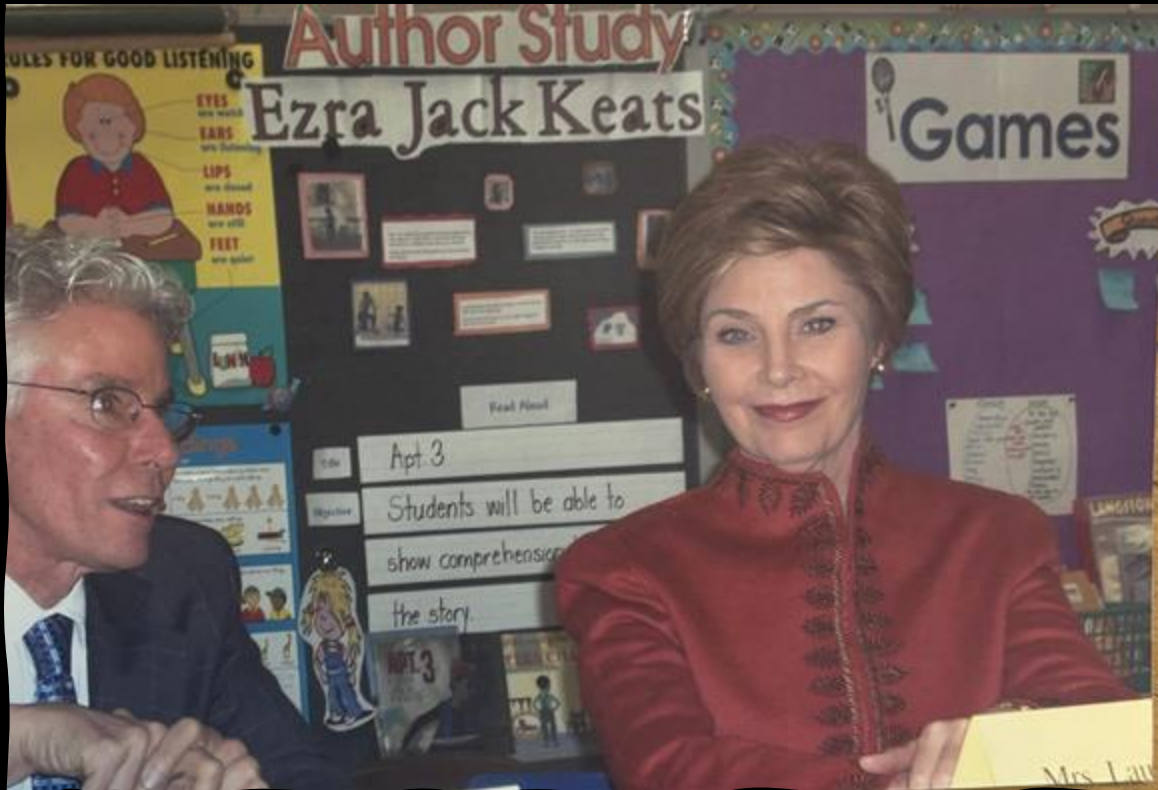

Margaret's Philosophy of Education

“...every child learns in a unique and fascinating way.”

“I hope to nurture the development of thinkers who show compassion to others, have the capacity to articulate their thoughts verbally and in writing, and are able to contribute positively to their community.”

WHY

Scientific Research & Classroom Practice:

How Structured Literacy Spans the Divide

By G. Reid Lyon and Margaret Goldberg

Comparing Evidence for Programs or Practices

Evidence-based	Directly tested in rigorous studies (randomized controlled trials, strong quasi-experimental studies) and has shown positive results
Research-based	Built on principles, theories or strategies that are supported by research, but the program or practice itself has not been directly tested
Emerging	Anecdotal evidence of effectiveness but research has not been conducted
